DETAILED ACTION

1. Applicant's arguments (see pages 4-6), filed on 10/25/2005, with respect to claims 1-2 have been fully considered and are persuasive. The rejection of claims 1-2 has been withdrawn.

2. Claims 1-2 are allowed.

The following is an examiner's statement of reasons for allowance: the primary reason for allowance of the claimed invention is the inclusion of, inter alia, the outputting circuit which is configured to output a low or high logical level on the basis of the relationship between current to be supplied from a current supply circuit to the sixth transistor and current flowing in the sixth transistor, and wherein the current supply circuit is made such that, when the supply of the current to first and second input-stage transistor circuits comes to a stop, current to be supplied to one of the fifth and sixth transistors increases while the current to be supplied to the other does not vary. The best prior art of record (see, Kasuya et al. US 2001/0009389 A1) discloses a multi-collector transistor arrangement of the claimed invention. However, Kasuya et al. fails to disclose or include the above features of the claimed invention. Therefore, claims 1-2 are allowed.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
